ABOUT MYSELF

- Senior software engineer and tech lead focused on cloud infrastructure and developer productivity: building resilient, reliable systems and automations that reduce delivery time from weeks to hours, with an emphasis on large-scale distributed architectures.
- Current focus: **Cognitive/Embodied AI** and agentic systems — tool-using agents in continuous cognitive loops, self-learning behaviors, and dynamic role switching capable of reasoning over complex operational scenarios (Vertex AI / Gemini).
- Experienced in leading engineering teams, fostering strong technical cultures, reducing delivery times, and mentoring developers to build scalable, high-performance distributed systems.
- Former **Google Developer Expert** (Cloud and Web). Public speaker and workshop/hackathon organizer aiming to share knowledge and empower the broader engineering community.
- Public speaking since 2008; speaker at dozens of conferences including JEEConf, UAWeb, Google DevFest, and BuildStuff (and helped organize some of them).

SKILLSET

AI/LLM: Cognitive/Embodied AI systems, Vertex AI (Gemini), tool-using agents, embeddings, vector search/RAG, evaluation & monitoring

Cloud/Infra: Platform engineering, Reliability, Resilience, Compliance, Scalability, Automation & Developer Productivity, distributed systems, GCP, AWS, Azure

Stacks: Python, Go, Java, .NET, C++, TypeScript/JS

Web: Angular, React, Lit

PUBLICATIONS

Technical publication
TDCommons

Jan 2026

Published: January 28, 2026. **Framework for Situated Agents Using Tool-Based Perception and Interaction in a Continuous Cognitive Loop**

WORK EXPERIENCE

Senior Software Engineer/TLM

Jan 2019 - Present

Google

- Google Cloud Platform: improved Google Cloud Console and core infrastructure, increasing scalability and reliability.
- Implemented automations that reduced engineering time from weeks to hours.
- Designed and implemented a cognitive AI system with an agentic-first approach, self-learning, and dynamic role switching.

Software Development Engineer

Feb 2018 - Dec 2018

Amazon

- Alexa Natural Language Understanding (NLU): improved reliability and latency of core components of the Amazon Alexa service.
- Focused on scalability and performance improvements in production services.

Web Team Leader

Apr 2017 - Jul 2017

MyHeritage

- Improved the front-end architecture and established a new front-end engineering team in Kyiv, leading hiring and onboarding.

Solution Architect, Head of Ukrainian branch

Feb 2010 - Feb 2017

Twinfield (Wolters Kluwer)

- Initially managed the Ukrainian branch as **Regional Director**, overseeing developers and shaping product requirements.
- Transitioned to **Software/Solution Architect**, architecting the migration of the core application to the cloud.
- Designed and implemented backend and frontend systems, establishing a unified development process and training engineers.
- Technologies: **ASP.NET MVC, C#, AngularJS, CQRS/ES, MS SQL, RabbitMQ**.

Earlier Software Engineering Roles

May 1998 - Apr 2009

Various Companies

- Held multiple software engineering and technical leadership roles focused on full-stack web development, billing systems, and high-performance databases.
- Technologies: C++, Java, Delphi, PHP, Perl, MySQL.

EDUCATION

Mathematics, Master of Science

1997 - 2003

NTUU "KPI"

National Technical University of Ukraine 'Kyiv Polytechnic Institute' (NTUU "KPI").

Gained **Master of Science** degree in **Mathematics** (Probability theory).
